## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6-8, 10-12, 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki (US 6,443,779).

Regarding claim 1, Suzuki, fig. 1-5, discloses a cassette relay block attachment structure comprising: a cassette relay block 15 having a lock portion 21 provided more inside than an outermost wall surface of a cassette relay block, the cassette relay block inserted into space surrounded by peripheral walls 22 on an attaching side 11, and fixed by the lock portion 23 and a locked portion located on the peripheral wall side of the attaching side.

Regarding claim 2, Suzuki discloses the lock portion and locked portion are housed in the projected area of a relay attached to the cassette relay block.

Regarding claim 3 and 10, Suzuki discloses the terminal housing parts 16 of said cassette relay block are arranged crosswise, and the lock portion is arranged in a range surrounded by crossing outer wall surfaces of the terminal housing parts.

Regarding claim 4, 11 and 12, Suzuki discloses the cassette relay block attachment structure characterized in that lock portion is a flexible lock arm.

Regarding claim 6, 16, 17, 18 and 19, Suzuki discloses the peripheral walls 22a on the attaching side are formed as a cassette frame.

Regarding claim 7, Suzuki discloses the cassette frame serves as one of the cassette relay block and other cassette electric parts mounting blocks.

Regarding claim 8, 20 Suzuki discloses the inner surfaces of the peripheral walls are housed in the projected area of the relay.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki in view of Polgar et al. (US 5,902,155).

Regarding claims 5, 13-15, Suzuki discloses all limitations except a rib provided on the opposite side to the lock portion side and for one of the cassette relay block and the peripheral walls and a guide groove for slide engagement with the rib provided for the other. Polgar et al., fig. 6-12, discloses a rib 52, 54 provided on the opposite side to the lock portion side and for one of the cassette relay block and the peripheral walls and a guide groove 36, 38. At the time the invention was made, it would have been to a person of ordinary skill in the art to provide Suzuki's cassette relay block with Polgar's et al. ribs and Suzuki's attaching side with Polgar's et al. grooves to provide insertion and fixing cassette relay block into attaching side (column 4, lines 37-48).

Art Unit: 2839

5. Claims 9, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki in view of Okabe et al. (US 6,375,517).

Regarding claims 9, 21 and 22, Suzuki discloses all limitations except the cassette frames having lock members, respectively are coupled to each other by the lock members. Okabe et al., fig. 1-6 discloses the cassette frames 24, 27 having lock members 12, 13, respectively are coupled to each other by the lock members. At the time the invention was made, it would have been to a person of ordinary skill in the art to provide Suzuki's cassette frames with Okabe's et al. lock members to provide the cassette frames are coupled to a connection box body having locked members to constitute an electric connection box.
